Special Session

Big data analytics driven by Internet-of-Things technologies: Big things have small beginnings

Organizers: Nikos Deligiannis, Vrije Universiteit Brussel – iMinds, Belgium, Ryoichi Shinkuma, Kyoto University, Japan, Yiannis Andreopoulos, University College London, UK.

Call for Papers

The Internet-of-Things (IoT) marries a plethora of dynamic communications technologies, ranging from low-level sensing to large-scale applications with social impact. Research advances in small-scale components, such as sensor networks and low-energy communications protocols, form the core of advances in sensing, wearable computing, smart homes and urban development. Programmability, data management frameworks and self-organized networks are also essential aspects in IoT frameworks. At the same time, the exponential growth in data generation and network traffic created by IoT deployments requires new architectures for large-scale data storage, processing and analysis. Big data analysis offers the possibility of increased efficiency by valorizing valuable insights, thus generating the need for extreme computing capabilities. Cloud computing has become the de facto model for large-scale computing networks, comprising servers, storage, services and applications, providing high computing power, high performance, and accessibility.

Special Session topics:

PHY/MAC/Network layer technologies for IoT:
- modulation, channel coding, multiple access strategies and protocols
- distributed vs centralized synchronization and coordination of transmission/reception
- network topologies and network management solutions for IoT

Big data sensing, processing, and analysis
- compressed sensing, data compression and aggregation methods
- edge-based vs server-based processing algorithms for IoT
- scalable, distributed computing, for IoT, e.g., Hadoop, Apache Spark, etc.
- (distributed) optimization methods for IoT-related data and communications systems
- privacy, security and data-integrity considerations for IoT communications
- inference and data analysis for (social data) networks

Cloud-computing support for IoT-oriented deployments
- energy-vs-billing tradeoffs in IoT data offloading in cloud computing systems
- X-as-a-Service in IoT, where X is: Backend, Database, Information, Infrastructure, Network, Platform, Security, Software, and Storage

Prospective authors are invited to submit high-quality original technical papers following the rules of the Main Track of ICT 2016 for presentation at the conference and publication in the ICT 2016 Proceedings and IEEE Xplore, via EDAS, using https://edas.info/newPaper.php?c=21703&track=78666.

Important dates

Paper submission deadline: February 20, 2016
Notification of paper acceptance: March 5, 2016
Camera Ready Papers: March 15, 2016

ICT 2016 Organizing Committee

General Chairs
Mischa Dohler, King’s College London, UK
George Karagiannidis, Aristotle University of Thessaloniki, Greece

Technical Program Chairs
Periklis Chatzimisios, Alexander TEI of Thessaloniki, Greece
Athanasios Lassoudis, Alexander TEI of Thessaloniki, Greece
Shiwen Mao, Auburn University, USA
Kan Zheng, Beijing University of Posts & Telecom., China
Vasilis Friderikos, King’s College London, UK

Special Session Chairs
Gennaro Boggia, Politecnico di Bari, Italy
Toktam Mahmoodi, King’s College London, UK
Ioannis Askoxylakis, FORTH-ICS, Greece

Workshop Chairs
Xavier Costa, NEC Europe, Germany
Constandinos Mavromoustakis, University of Nicosia, Cyprus
Mahasweta Sarkar, San Diego State University, USA

Panel Chairs
Stefano Giordano, University of Pisa, Italy
Simone Redana, Nokia Networks, Germany
Rasmus Nielsen, Cisco Systems, USA

Tutorial Chairs
Petar Popovski, Aalborg University, Denmark
Gunes Karabulut Kurt, Istanbul Technical University, Turkey
Dimitris Vergados, University of Piraeus, Greece

Publicity Chairs
Honggang Zhang, Zhejiang University, China
Burak Kantarci, Clarkson University, USA
Marco Di Renzo, CNRS/Supelec, France
Shui Yu, Deakin University, Australia
Vijay Rao, Delft University of Technology, Netherlands

Award Chairs
Hanna Bogucka, Poznan University of Technology, Poland
Christos Douligeris, University of Piraeus, Greece

Co-founders of ICT
Hamid Aghvami, King’s College London, UK
Farokh Marvasti, Sharif Univ. of Technology, Iran
